

SEN Science: A Practical Approach

Woodfield Teaching School Alliance is pleased to offer this Science course for SEN Teachers and Science Assistants

Course Outline

This course addresses the challenge of teaching Science to pupils who have learning difficulties. The session will include practical lesson activities. It gives participants the opportunity to look at learning resources, which help pupils engage fully with the curriculum. Specific intervention strategies that are used to ensure progress will be shared with participants.

This department is one of the most successful in an outstanding school. Its achievement levels exceed targets year upon year.
