

# Communication Support for Verbal Pupils with ASD

This NEW UPDATED practical training course is specifically designed for staff working in primary and secondary schools to enable them to develop the communication skills of pupils with autism.

## Course Outline

This training programme has been UPDATED to reflect the changes in diagnostic criteria and includes a whole session on managing pupils with sensory conditions in the classroom.

The programme has been developed for practitioners working with children with autism spectrum disorder (ASD). It contains a wealth of practical ideas to support those who are working with verbal children with social communication difficulties aged from 4-14.

There are five, four-hour sessions giving a total of 20 hours teaching.

Participants can achieve a Level 3 or Level 2 nine credit Award in Knowledge and Practice to Support the Communication skills of ASD – both levels are now on the QCF! A portfolio of evidence will need to be submitted.

## Outcomes

Participants will be able to;

- Promote vocabulary development.
- Promote effective communication and social skills through understanding pragmatic language skills and how to support development of emotional literacy
